Guidance Part E – Tendering and appointments

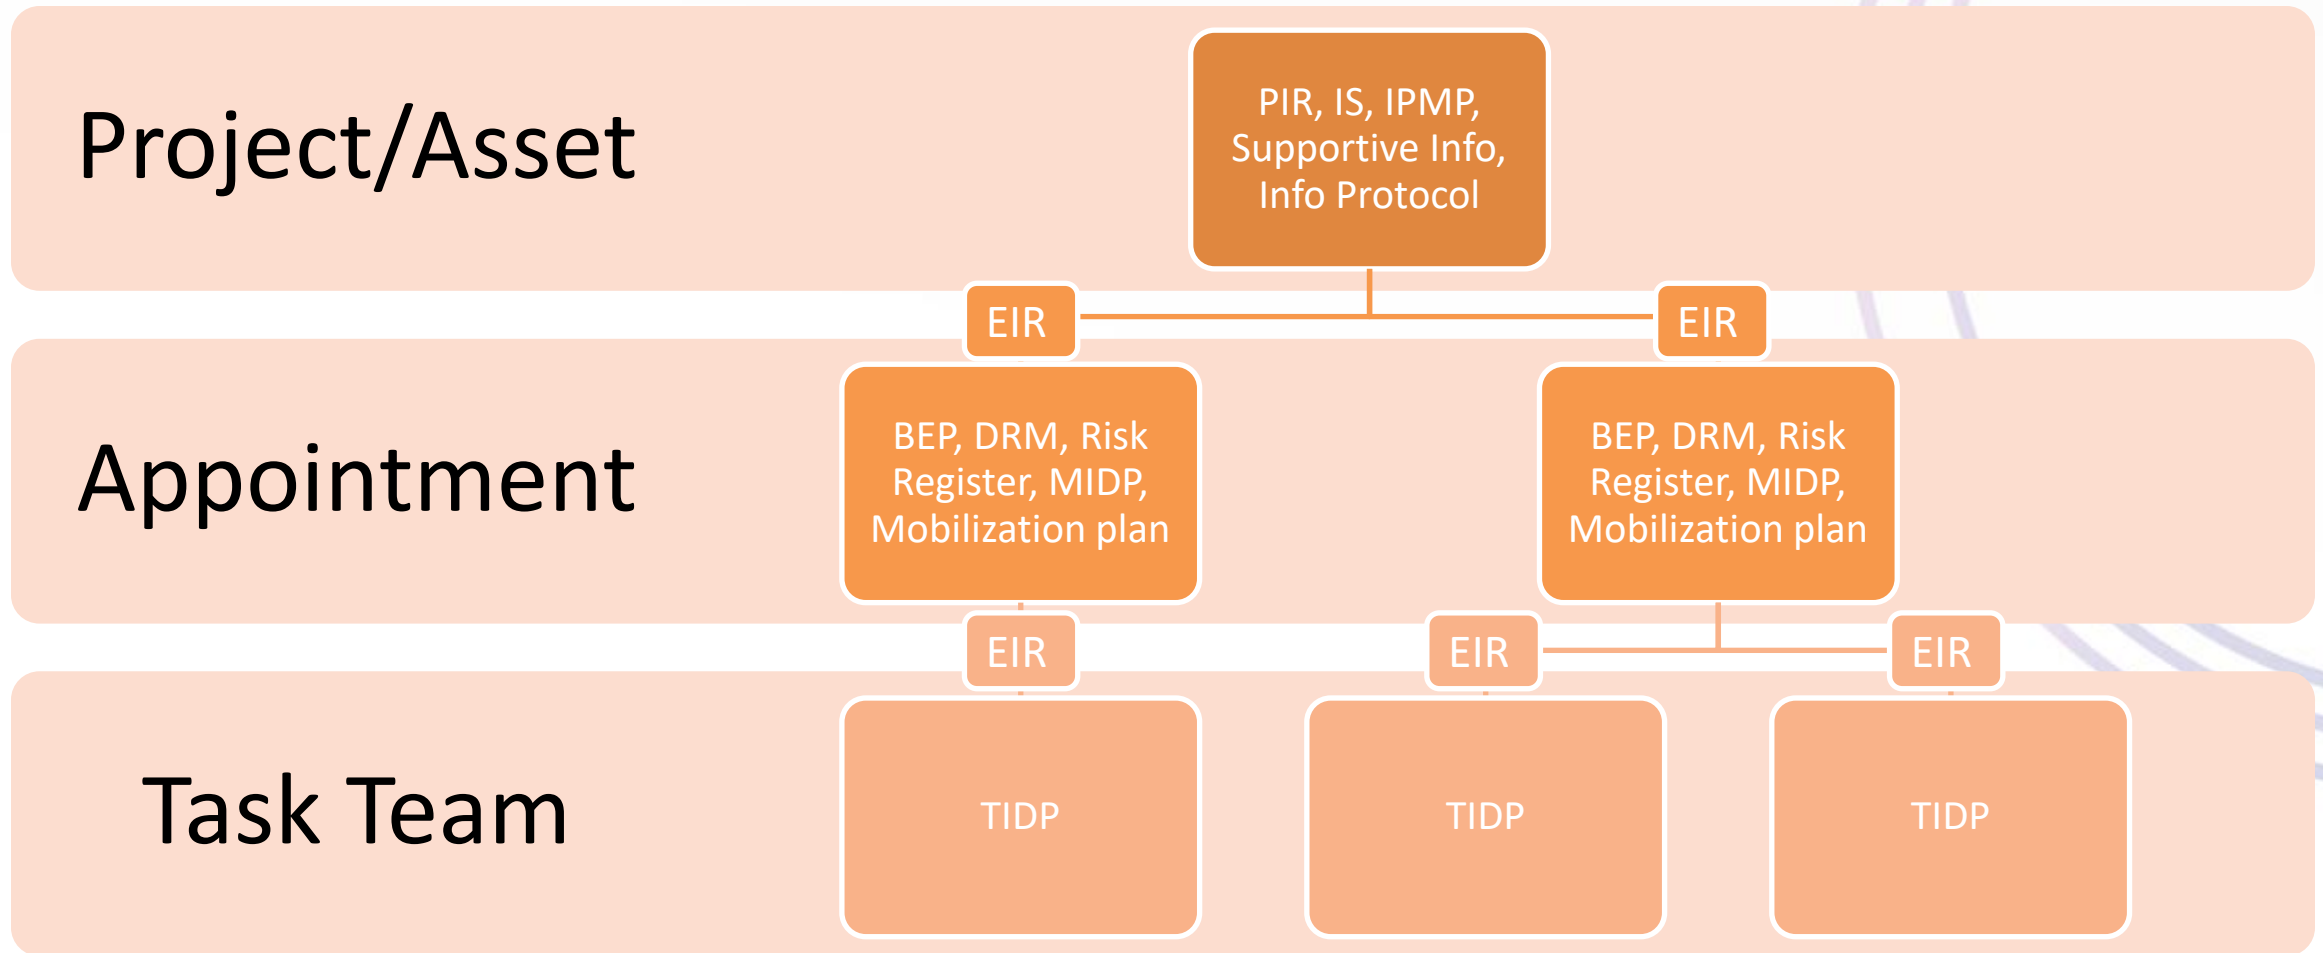

Dan Rossiter

Tender Information

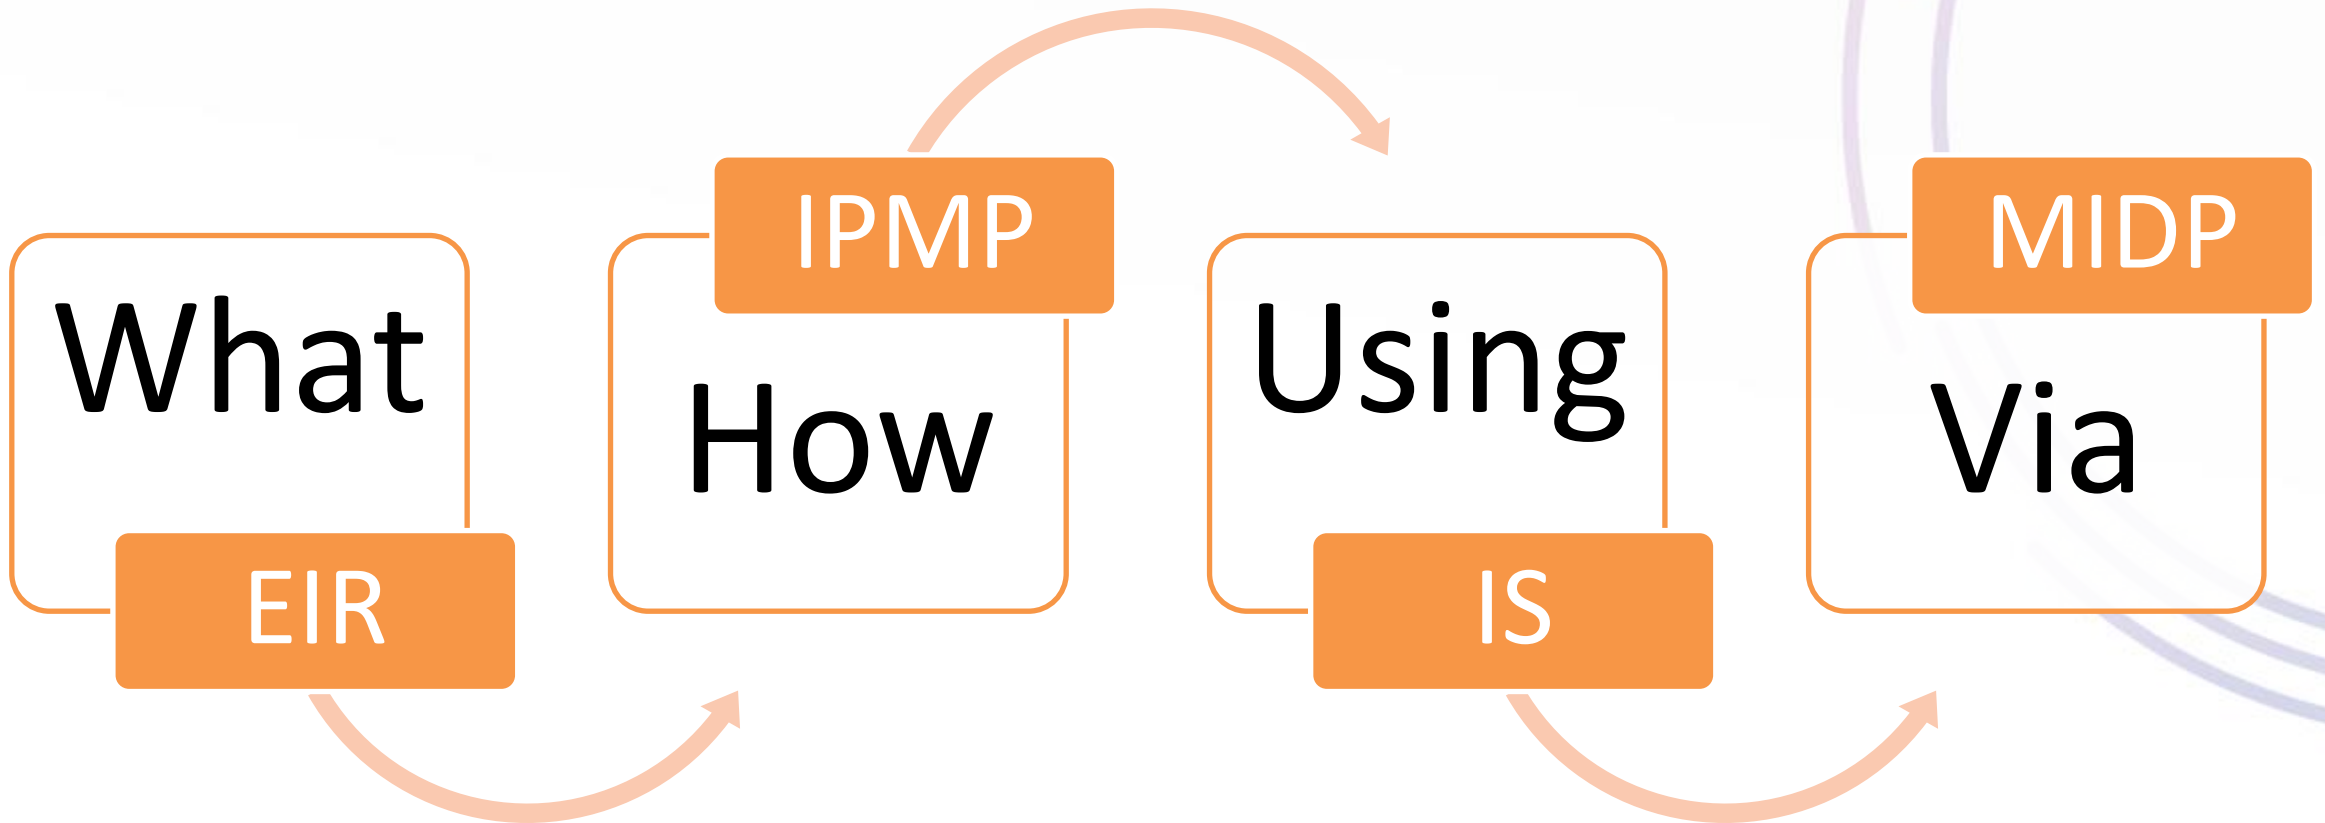

ISO 19650-2, 5.2.4 and **ISO 19650-3, 5.2.5** ask for the following tender information to be compiled:

- Exchange Information Requirements (**See Part D**);
- Reference Information and Shared Resources;
- Response Requirements and Evaluation Criteria;
- Information Standard (**Updated**);
- Information Production Methods and Procedures (**Coming soon**); and
- Information Protocol (**Updated**).

Resource Hierarchy

Information Production, Review and Delivery

Information Standard

The **Information Standard** is related to:

- Establishing exchange information requirements;
- Compiling invitation to tender information;
- Establishing and confirming the BIM execution plan;
- Establishing the delivery team's risk register;
- Compile appointment documents;
- Generate information; and
- Undertake quality assurance check.

Information Standard

When establishing the information standard

Information Standard

When establishing the information standard

- Header
- Structure
- Content

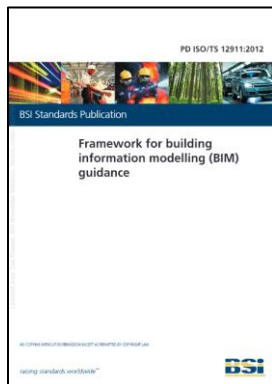

BS EN ISO 7200

- Legal Owner
- Identification Number
- Date of Issue
- Segment/Sheet Number
- Title
- Creator
- Approver
- Document Type

Information Standard

When establishing the information standard

- Header
- Structure
- Content

PD ISO/TS 12911

Example References:

- 1.1 Outputs
- 1.2 Outcomes
- 2.1 Project Stages
- 2.3.2 Information levels
- 2.4.4 Versioning
- 2.4.5 Status
- 3.2.2 Grouping

Information Standard

When establishing the information standard

- Header
- Structure
- Content

ISO 19650-2, NA

Example Content

- Naming conventions
- Standard codes
- Schema / Data Models
- Classes
- Properties
- Units

Summary

The **Information Standard**:

- Is developed at the project / asset level;
- Forms part of the tender information; and
- Defines the standards to be used when producing, reviewing and delivering information.

Guidance E will also be updated in due course to include the **Information Production Methods and Procedures**.
