

UK BIM FRAMEWORK

bsi. cdbb UKBIM ALLIANCE

How the UK BIM Framework will help your business

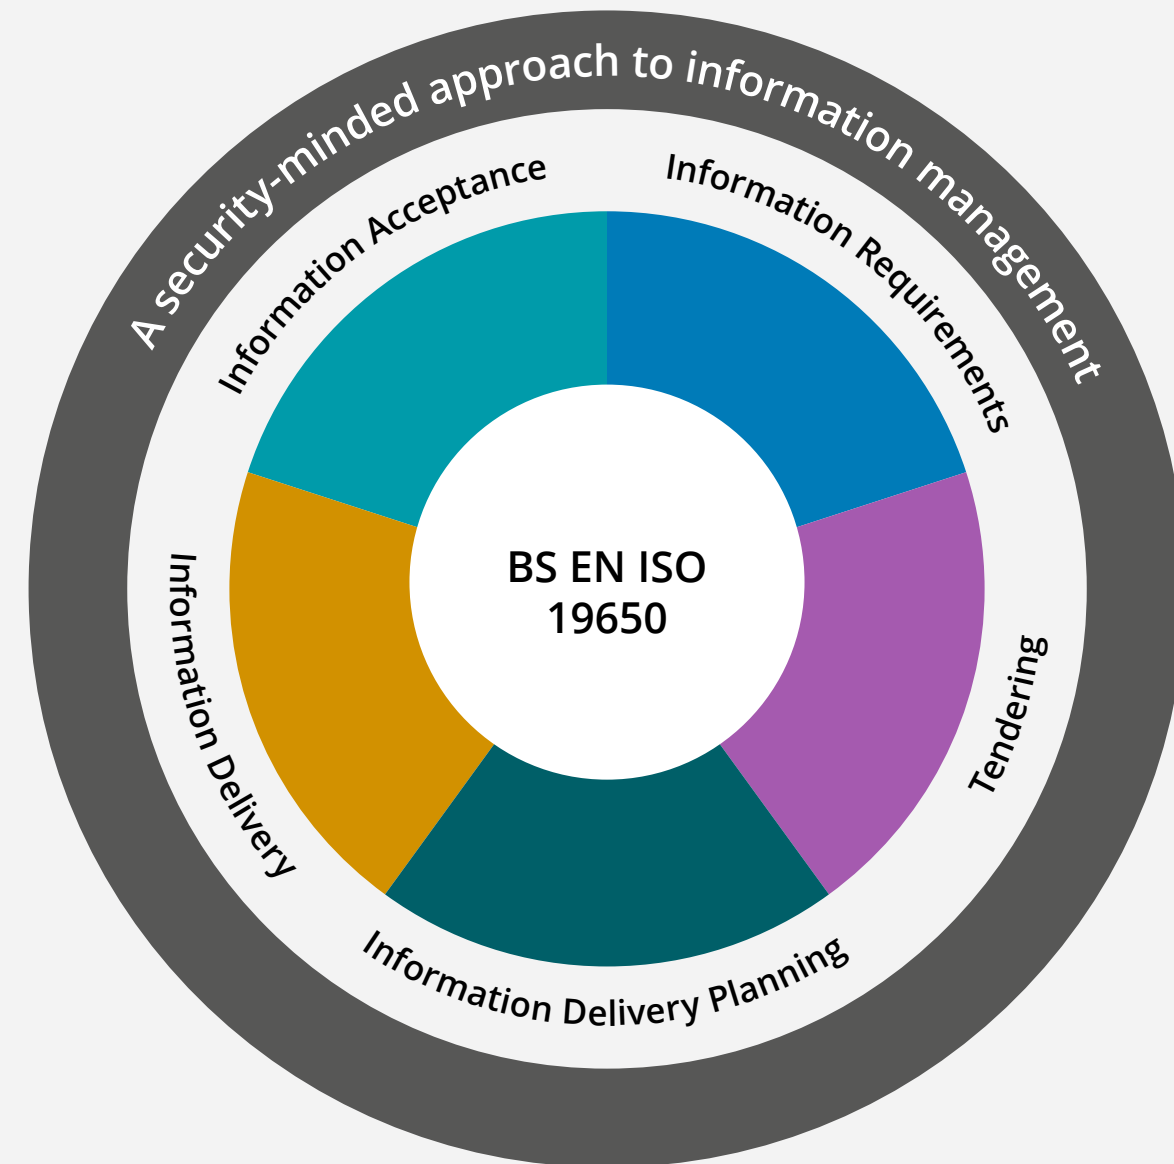

The UK BIM Framework is...

an overarching approach that helps you to implement information management successfully into your business.

The Construction Playbook was created to ensure that we change our approach to delivery and asset operation. It recommends using the UK BIM Framework to align with the correct standards as well as having the right tools and guidance to make this a reality.

Begin implementing better information management into your organisation, with the guidance and support of the UK BIM Framework.

UKBIMFramework.org

Key benefits:

Helps owners and operators achieve their business objectives and reduce the risks and costs through effective, secure and efficient production, use, and management of information
